CHEMICAL INDUSTRY

FOR ALL COMPANIES THAT PRODUCE, PACK AND SEND CHEMICAL PRODUCTS IN STANDARD OR SPECIAL PACKAGING, SUCH AS BARRELS OR CANS.

CHALLENGES

Chemical labels need to be applied securely on a wide variety of packagings such as barrels, canisters, containers, IBCs, big bags, bottles and pallets. For the adhesion to these products it is necessary that labels fulfill certain requirements in order to meet the standards of this specific industry. Durability, weather and chemical resistance are only some of them. In addition, the chemical industry also has to meet the „British Standard 5609 Section 2“ as well as the health and safety protection (GHS).

OUR SOLUTION FOR YOU

NOVEXX Solutions offers you a wide range of label characteristics to meet the conditions and regulations within this industry. Our labels have been developed exactly to the requirements of this industry. Either as branding or decoration of chemical products – our labels are of the highest quality and also pass with excellence when it comes to adhesion, even with hot contents.

CHOOSE BETWEEN:

- Large blank labels
- Labels with extremely high adhesion
- Labels especially for hot contents
- Labels, which are resistant to weathering or seawater and comply with the certifications
- Completely printed labels for dangerous goods in diamond shape and in strong colors
- ... and many more

FOR ALL COMPANIES THAT PRODUCE, PACK
AND SEND PRODUCTS FOR PERSONAL CARE.

PERSONAL CARE INDUSTRY

CHALLENGES

Within the cosmetics industry, product labeling is not only used to provide information on ingredients. In no other industry does the visual appearance and the aesthetic design of the label play such an important role. Labels in the cosmetics industry act as the main advertising medium and represent the brand and its image. Cosmetic labels attract the attention of the customer and have a huge influence on buyers behaviour and decision.

OUR SOLUTION FOR YOU

Cosmetic labels need to be waterproof, resistant to cleaning substances, oil-repellent, well adhering (even with tight radius) and durable. Due to the different materials, shapes and sizes, and also the finish, labels grant a certain value, which represents the company's brand.

CHOOSE BETWEEN:

- Multilayer labels, booklets and wrap-around labels
- No label look labels
- Safety labels
- Finished labels

- 3D effect labels
- Embossed labels (hot and cold)
- ... and many more.

FOOD INDUSTRY

CHALLENGES

The food industry uses labels primarily to identify products such as fresh, frozen or dry goods - no matter if the label is applied directly to the product or on the packaging. Our labels can also be used for logistical processing, such as storage and shipping. For this industry, labels have to withstand many different challenges, such as moisture, cold or heat. Food labels need to fulfill specific requirements, such as HACCP or the approval requirements according to BFR and FDA and ISEGA.

OUR SOLUTION FOR YOU

Our labels are low-migration, contain adhesives and printing inks that meet the prescribed requirements and are therefore permissible. They are resistant to cold and heat and are perfectly suited for direct application to the food itself or its packaging surface.

CHOOSE BETWEEN:

- Resealable labels
- Roll labels with wet-strength adhesives
- Pallet labels for different surfaces
- Frozen food labels
- Labels with permanent adhesion
- Beverage crate and shrink labels
- Sustainable labels
- Sandwich labels
- ... and many more.

FOR ALL COMPANIES THAT PRODUCE, PACK AND SEND FOOD AND FOOD INGREDIENTS FOR HUMAN CONSUMPTION.

FOR ALL COMPANIES THAT MANUFACTURE,
PRODUCE, STORE, REPACKAGE AND SEND
PHARMACEUTICAL PRODUCTS.

PHARMA INDUSTRY

CHALLENGES

In no other industry is secure and error-free product marking/identification so important. We are aware of this and know that a smooth labeling of pharmaceutical products must comply with numerous specifications and guidelines, such as the Global Compliance Standards, product and counterfeit protection requirements and ISEGA approval. In addition to these requirements, the labeling must meet also any basic requirements such as product branding and traceability.

OUR SOLUTION FOR YOU

We offer labels that meet all requirements of the pharma industry. Labels from NOVEXX Solutions are suitable for deep-freezing, resistant to solvents and disinfectants and are resistant to moisture, grease and oil. Choose NOVEXX Solutions labels when you need reliable adhesion, even on difficult surfaces or a small radius.

CHOOSE BETWEEN:

- Booklets & wrap around labels
- Multilayer labels
- Labels for bottles
- Labels for test tubes and curved surfaces
- All-round bonding for ampoules
- Labels for vials, syringes, pre-filled syringes
- No label look labels for glass and plastic
- Direct blood bag labeling
- Closure labels
- Tamper evident and security labels
- Labels for blood collection tubes
- Labels for blind people
- ... and many more.

FOR ALL COMPANIES THAT STORE, REPACK AND SHIP PRODUCTS.

CHALLENGES

Smooth processes, high reliability along the entire supply chain and punctual delivery are central requirements within logistics. In order to meet the regulations for information-, address- and shipping labels, it is essential to have a very good barcode readability and extremely good initial adhesion. Also deep-freeze storage and weather or seawater resistance must be taken into account.

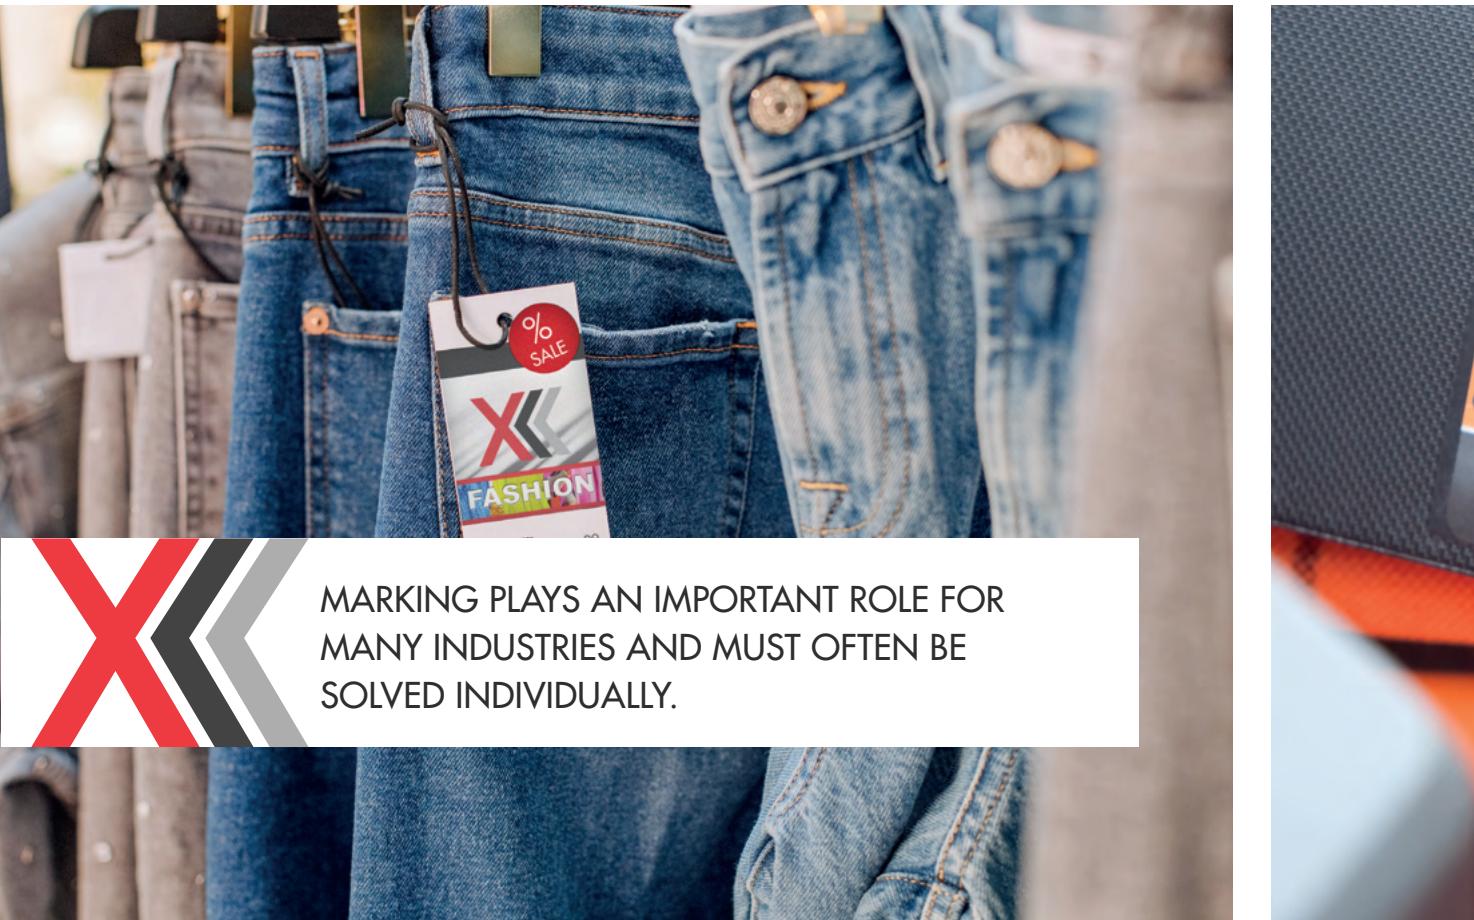

OUR SOLUTION FOR YOU

We offer the highest security along the entire supply chain. Labels from NOVEXX Solutions can be applied to a wide variety of cardboards or other packaging surfaces at cool or humid temperatures and even in a dusty environment. This ensures the flow of information and a smooth supply chain.

- Blank labels for variable printing
- Labels that are weatherproof or seawater resistant
- Thermal labels for variable imprint
- Ultralight removable labels
- Labels for identification in the deep-freeze sector
- Labels for lye and washing processes
- Labels with thermal direct, thermal transfer or laser printing
- Labels with very high final adhesion or easy removal
- Labels with extremely good initial adhesion

... and many more.

LOGISTIC INDUSTRY

AUTOMOTIVE AND ELECTRONIC INDUSTRY

The marking of machines, devices and technical components often takes place under the most extreme conditions. Labels from NOVEXX Solutions are resistant to abrasion, heat and chemicals. Our labels resist humidity and large temperature variations.

CHOOSE BETWEEN:

- Adhesive foil
- Chemical-resistant labels, labels for dangerous goods
- Front display, plotter foil
- Rating plates and inlays
- Security labels
- ... and many more.

NOT THE RIGHT ONE?

The demand for labels and the variety of combinations is almost unlimited. For this reason, we cannot list all industries and types of labels. But still we realize almost any request. Please contact us and together we will work out the ideal label for marking your product.

OTHER INDUSTRIES

TEXTILE INDUSTRY

Whether hang tags, security labels or pricetags. In the textile industry, a wide variety of labels are required. We at NOVEXX Solutions are happy to help you with this as well.

CHOOSE BETWEEN:

- Hang tags
- Cardboard labels
- Security labels (RFID)
- Self adhesive labels
- ... and many more.

OUR HIGH QUALITY THERMAL TRANSFER
RIBBONS ARE SUITABLE FOR ALL PRINTERS
ON THE MARKET.

THERMAL TRANSFER RIBBON

THE BEST FITTING THERMAL TRANSFER RIBBON TO YOUR LABEL

For an optimal identification, it is important that you not only choose the right label, but also the appropriate thermal transfer ribbon. Due to the fact that not every label is compatible with every ribbon or produces the desired print result it can be difficult to choose the right thermal transfer ribbon. Print ribbons are available in many different sizes, colors and materials. Basically there are three main categories, each has its own advantages: Wax, wax/resin or resin.

However, the choice between these three quality types is so specific and depends on several factors. Only a specialist can judge what best suits your product and production process. The following questions must be asked and clarified:

ON WHAT would you like to print?
WHAT should be printed with?

WHAT would you like to label?
WHAT should the print result look like?

THERMAL TRANSFER RIBBON FOR YOUR DEMANDS

- Wipe and scratch resistant
- Moisture resistant
- Solvent resistant
- Heat resistant
- Deep-freeze resistant
- UV light resistant

SUSTAINABILITY

SUSTAINABLE LABELS

Sustainable packaging and labeling is becoming more important for our customers. As a supplier of labels we would also like to contribute to environmentally friendly labeling. For this purpose we offer labels especially on request in different sustainable materials.

OUR SOLUTION FOR YOU

SUSTAINABLE LABELS MADE OF:

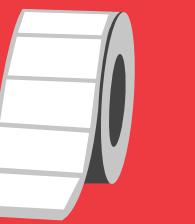

- Compostable, biodegradable material
- Recycled materials, such as recycled polyethylene or recycled paper
- Environmentally friendly grass or stone paper
- Linerless label material

DID YOU KNOW?

You can also achieve a sustainable labeling process without unique & intelligent ribbon saving technology - „RibbonSave“. For more information please feel free to contact us!
